Welcome Address

Dear Colleagues,

On behalf of the Organizing Committee we cordially invite you to join the 9th Congress on Women's Health and Disease "From Puberty to Menopause" which will be held in August 28-30, 2014 in the Athens Hilton, Greece.

The Congress is organized by the 2nd Department of Obstetrics and Gynecology of the University of Athens and the Hellenic Society of Pediatric and Adolescent Gynecology with the collaboration of worldwide scientific societies. The scientific committee has focused on hot topics of gynecology and obstetrics, endocrinology and reproductive medicine. This will be achieved through the kind collaboration of many distinguished speakers.

Athens is renowned for its historic monuments of classical antiquity, such as the Parthenon, the Agora, the Odeion of Herod Atticus, and the Temples of Theseus and Zeus. Participants will also have the opportunity to visit the museum of Cycladic civilization and the archeological museum, the unique Acropolis museum and the Benaki Museum, where the Gala Dinner will take place.

We are looking forward to welcome you in Athens this August.

With our best wishes,
Professor G. Creatsas MD, FACS, FRCOG, FACOG
Congress President

COURSES

Course 1 Friday August 29th, 2014 14:30-17:00

Core Obstetric Ultrasound Hands-on Course

The Core Obstetric Ultrasound Hands-on Course is designed to offer practical elements and basic knowledge components within the scope of the core ultrasound curriculum. It is intended for Obstetricians and Gynecologists and other professionals (Radiologists and Midwives) whose experience in obstetric ultrasound is as yet limited and who wish to further hone their skills.

Our aim is to provide participants with ample knowledge of core obstetric ultrasound techniques as well as their applications.

The first segment of the course is comprised of interactive lectures offering “How do you do it” pointers. During the second segment, participants will be given the opportunity to conduct scans on female volunteers of a range of gestational ages.

A limited number of participants will be accepted in order to guarantee the benefits of small group teaching.

Part 1 – Interactive presentations

Machine set-up, knobology, and safety

Early pregnancy features (normal gestation sac and crown rump length charts, sonoembryology).

Fetal growth (normal, abnormal, causes).

Amniotic fluid (normal, abnormal) and placenta (development, classification, position).

Part 2 – Hands-on

Participants will have practice in several components of ultrasound scan procedures on a number of skills stations.

Transabdominal obstetric live scanning will be conducted in small parallel groups.

Workshop 1: Image acquisition, knobology, optimization and machine related skills.

Workshop 2: Conducting a 6-10 week scan.

Workshop 3: Conducting a fetal growth scan.

Workshop 4: Assessment of amniotic fluid and placenta

Course 2 Saturday August 30th, 2014 13:30-16:30

Advanced Life Support in Obstetrics: Postpartum Hemorrhage Course

The 2nd Department of Obstetrics and Gynecology of the University of Athens Medical School, in cooperation with the Hellenic Society of Obstetric and Gynecologic Emergency, will be providing a 2½ hour course of interactive presentations and workshops on postpartum hemorrhage (PPH).

The first part, duration of 1 hour, will furnish participants with the knowledge required for successful implementation of a comprehensive surgical approach in a hospital facility. It is composed of lectures, videos and discussions focusing on surgical treatment.

The second part of the course consists of two workshops, duration 45 min each, aiming at reduction in severe maternal mortality and morbidity. The participants will be instructed in successful PPH treatment via both the pharmaceutical and the manual mode, and, based on the knowledge acquired, will have practice in effective use of algorithms and development of strategies and action plans within their place of work. The second workshop will also demonstrate the innovative Bakri balloon as an efficacious treatment modality of PPH prior to proceeding to surgical treatment.

On account of limited placement, we kindly request you to apply only if you plan to attend. If you need to cancel, please notify the organizers as early as possible.

Part 1 – Interactive presentations

B-Lynch suture.

Internal iliac and uterine artery ligation.

Obstetric hysterectomy.

Pelvic packing.

Part 2 – Hands-on

Workshop 1: Manual and pharmaceutical treatment of PPH

Workshop 2: Bakri Balloon after vaginal birth or Cesarean Section
