Multidisciplinary Approach In Breast Cancer:

Modern Trends & New Surgical Innovations In Early Breast Cancer

Course President

Prof. Sherif Omar

Course Moderators

Prof. Tamer Youssef

Prof .Omar Sherif Omar

Welcome Message

We are honored to be chosen by the executive board of the MANOSMED to organize the upcoming summer course of the Mediterranean Mobile Breast University under the guidance and auspices of the University of Montpellier. We are also delighted to welcome you all in Hurghada, the magnificent city of the red sea. This summer course is a special one as it represents the 15th course of the mobile breast university as well as the 25th year of start of the activity of the MANOSMED.

The MANOSMED courses in the past years have always insisted on the philosophy of group practice in the field of breast with special emphasis on the wording (team). For that reason our course is focusing on the multidisciplinary approach in the treatment of breast cancer. We have tried as much as possible to make the program be interactive one rather than just classic presentations with limited discussion time. For that reason we managed to get at the end of the various sessions appropriate time for these types of interactive discussions and presentations.

This course is conducted under the patronage of the newly established African Breast Cancer Foundation. This foundation is mainly concerned with public awareness, breast health education as well as training and treatment. The integration of the activities of this newly established foundation and the MANOSMED will be of great value for whole of Africa in establishing the African Breast Cancer Program.

We are also proud that we are conducting this course in collaboration with Kasr Aini School of Oncology. This group with its internationally well-known and respected director Prof. Hamdy A. Azim is a new added value to our mobile breast university and we hope that this collaboration remains in future courses. The condensed oncology program with its interactive discussions is one of the highlights of this event and represents a true collaboration between all the stakeholders involved in providing care for the breast cancer patient.

At last , I hope that this summer course will be of great added value for both the faculty and the students and we hope to be able to organize this event once more again in the near future.

Prof. Sherif Omar
Course President

Celebrating

25

Years of SUCCESS

MANOSMED

Dear Colleagues, Friends, Residents and Students,

It is a great pleasure and honor to welcome you to Hurghada - the fascinating city of the red sea this year for the 15th Advanced Course in Mastology. Egypt is well known for its excellent medical level and exceptional Medical Schools. Egyptians are also well known for their hospitality and warmth to visitors. I would like to thank all the Egyptian colleagues and friends and particularly Professor Sherif Omar, the Director of the Course in May 2014, who organized this important teaching course again. Professor Sherif Omar also organized a previous course in Alexandria in 2004 with great success.

I would also like to once again thank Professor J. L. Lamarque, founder of MANOSMED, who gave us the opportunity to continue his work and to create the "*MANOSMED Mobile University*". More than 70 university professors, from 18 countries (Albania, Algeria, Cyprus, Egypt, France, Germany, Greece, Italy, Lebanon, Libya, Monaco, Morocco, Portugal, Romania, Spain, Switzerland, Syria and Tunisia) all participated on a voluntary basis and give lectures twice per year for a total of 4 modules. After the 4 modules, the residents and physicians obtain their qualification in Mastology (Senology) with an International Diploma of Mastology, MANOSMEDI, under the auspices of the University of Montpellier 1 in France.

MANOSMED promotes scientific exchanges between the different countries, coordinates the quality of diagnoses and treatment in a spirit of friendship and solidarity. The program of the Hurghada course is entitled "*Early Breast Cancer*" and will cover a very important facet of breast problems which concerns gynecologists, radiologists, surgeons, endocrinologists, GPs, etc.

I trust the extraordinary atmosphere of the "*Red Sea*" which will provide us with unforgettable memories. Welcome to Egypt!

Prof. Dr. Stephane Zervoudis
President of MANOSMED

History of MANOSMED

(Celebrating 25 years of SUCCESS)

1990

July 11, 1990 :Barcelona (Spain) : Prof. Jean-Louis Lamarque and Prof. Miguel Prats-Esteve : first contacts for the creation of an association for the promotion of quality of screening: SANOMED (Screening Association of NORthern MEDiterranean)

1991
